

MORE THAN *just* CAPITAL

Satori Capital manages more than \$1 billion of committed capital with more than \$350 million dedicated to private equity. We are actively seeking majority and minority investments in rapidly growing businesses with \$5 million to \$25 million of EBITDA.

HOW WE ARE DIFFERENT

We invest in businesses that operate with a long-term perspective, employ the principles of conscious capitalism, and will benefit from our operating experience.

Long-Term Perspective

We are business builders who seek to maximize long-term value and create defensible industry leaders. Our evergreen fund structure enables us to hold investments for the long term, and our investor base of business owners, family offices, and foundations serves as a patient source of capital. As a result, our portfolio companies operate without the pressure to accept tradeoffs associated with short-term investment horizons and instead seek to optimize outcomes for all stakeholders in the long run.

Conscious Capitalism

We believe that businesses that employ the principles of conscious capitalism generate better returns with lower overall risk. These businesses commit to their mission or purpose and create value for all stakeholders. We believe they are more innovative, less risky, and better-positioned to deliver superior performance in the long term because all stakeholders have a vested interest in the success of the business.

Operating Experience

We partner with leadership teams of companies in industries in which we have relevant expertise and when there is an opportunity to accelerate growth with our experience, networks, and insights through a long-term partnership.

Our leadership team has a long and successful track record as founders and CEOs of privately owned and publicly traded companies. We have led rapidly growing businesses at all stages of development and through all business cycles.

Investment Criteria

- Rapidly growing businesses with EBITDA of \$5 million to \$25 million
- Leadership teams that embody the principles of conscious capitalism
- Talented leaders seeking to increase their companies' growth trajectories
- Majority and minority investments with like-minded partners
